

SURE, IT'S GOING TO STAY.

THE SURENAIL® DIFFERENCE

Breakthrough Design

Featuring a tough, woven engineered reinforcing fabric to deliver consistent fastening during installation.

Triple Layer Protection™

A unique "triple layer" of reinforcement occurs when the fabric overlays the common bond of the shingle laminate layers that offers excellent fastener holding power.

2X Bond Area + Strength

Our enhanced Tru-Bond® sealant grips tightly to the engineered fabric nailing strip on the shingle below. Specially formulated, wide adhesive bands help keep shingle layers laminated together.

Exceptional Wind Resistance

Engineered to deliver 209 KM/H / 130 MPH* wind warranty performance with only 4 nails. 33% fewer nails are required for warranty protection, which can mean fewer deck penetrations.

The Essentials for a Complete Roofing System

A. Ventilation Products. Help protect a roof from premature failure by helping remove heat and moisture from the attic.

B. PINK® FIBERGLAS® Blown-In Insulation. Tiny air pockets trapped in the insulation resist the passage of heat flow.

C. Owens Corning® Hip & Ridge Shingles. Help protect the ridge vent and add an attractive, finished look to a roof's hips and ridges.

D. Owens Corning® Shingles. Add durable beauty to a home. Shingles are the first line of defense against the elements.

E. Owens Corning® Underlayment Products. Add an extra layer of protection between the shingles and the roof deck to help prevent damage from wind-driven rain.

F. WeatherLock® Self-Sealing Ice & Water Barrier Products. Help guard vulnerable areas where water can do the most damage to a roof: eaves, valleys, dormers and skylights.

G. Owens Corning® Starter Shingle Products. The first step in the proper installation of shingles.

H. Underweave Ventilation Products. Help prevent moisture build-up in the attic by working with ridge vents to keep air moving.

SURENAIL
TECHNOLOGY®

SURE, IT'S EASY TO USE... AND SELL.

It's no wonder that TruDefinition® Duration® Shingles from Owens Corning are easy to sell to even the most discerning homeowner. Available in a wide variety of designer colours with bold contrast and deep dimension they add magnificent curb appeal.

And, thanks to Owens Corning's proprietary SureNail Technology®, they provide outstanding performance in wind resistance, bond strength and quick install time.

SURENAIL TECHNOLOGY®

There's a line between a good shingle and a great shingle. It's the nailing line on our SureNail Technology®.

Excellent Adhesive Power
Helps keep the shingle layers laminated.

Outstanding Grip
The SureNail® strip enhances the already amazing grip of our proprietary Tru-Bond® sealant for exceptional wind resistance of a 209 KM/H / 130 MPH* wind warranty.*

Breakthrough Design
SureNail Technology® is the first and only reinforced nailing zone on the face of the shingle.

"No Guess" Wide Nailing Zone
This tough, engineered woven-fabric strip is embedded in the shingle to create an easy-to-see strong, durable fastener zone.

Triple Layer Protection™+
A unique "triple layer" of reinforcement occurs when the fabric overlays the two shingle layers, called the common bond area.

Double the Common Bond
SureNail® features up to a 200% wider common bond area in the nailing zone over standard shingles.

"NO GUESS" NAIL ZONE

SureNail Technology® is the first and only reinforced nailing zone on the face of the shingle.

During extensive field trials[^], 87% of contractors rated TruDefinition® Duration® Shingles with SureNail Technology® as "clearly the best" for blow-through resistance, as compared to other shingles they have installed. Less blow-through can result in fewer callbacks.

"It's much stronger than the competing products' nail line, avoiding blow-through for shingles that are being installed with pneumatic nail guns."

- Dale Tadlock, Tadlock Roofing, Tallahassee, FL
